

NEWSLETTER

HIGHLIGHT

We wish to outline our achievements over the past years:

1. We have been able to get our International Standard Serial Number (ISSN) for both print and digital articles.
2. All our published articles now have a Digital Object Identification (DOI).
3. All our published articles and PDFs have an individual and unique URL.
4. All manuscripts pass through a quality control system (peer review) before publication.
5. All articles are licensed under the Creative Commons licenses.
6. GMP journals has developed a plan for electronic backup and long-term digital preservation of the journals published.
7. All our articles are now indexed in google scholar, Zenodo and OpenAIRE.

All these achievements are in line with the good publishing practice internationally recommended.

GMP JOURNALS

Happy new year 2023. We are excited to start the new year with our very first newsletter for GMP Journals. Over the past few years, we have seen tremendous growth in the number of articles published and in our pool of peer reviewers and editorial board.

With this increase, we are also increasing the quality of papers published. In addition to these, we have increased our academic scope of work from the previous Journal of Contemporary Social Sciences and Education (JCSSE) to having three additional journals i.e

- Journal of Contemporary Agricultural Practice (JCAP),
- Journal of Contemporary Biotechnology (JCB) and
- Journal of Contemporary Chemistry (JCC).

We hope to continue increasing our academic scope based on our authors' increasing demands.

CALL FOR PAPERS

We wish to invite you to submit your original work for publication in our various academic journals. Your manuscripts can be in the form of short communications, the latest research papers and findings, technical reports, review papers, and or conceptual papers.

Visit our website <https://www.gmpjournals.com/author> for instructions on the manuscript submission process.
